DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 29, 2004 has been entered.

Receipt of applicants' amendments and remarks submitted November 29, 2004 is acknowledged. Following restriction requirements is necessary in view of the complexity of the subject matters within the claimed invention.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-25, 42-56, drawn to a method of using phosphocholine or derivatives, classified in class 514, subclass 77.
 - II. Claims 39-41, drawn to a method of using antibody or its fragment, classified in class 514, subclass 1.
2. Inventions group I and group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions modes of operation. Particularly, invention groups I and II employ structurally distinct materials, antibodies and phosphocholine derivatives.

Art Unit: 1617

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
